## 2 Attachments

Cayuga\_Strat\_Jan2011.xlsx GE\_Amend5\_Well\_Coordinates.xls

Attached is an updated Excel file that contains the locations and stratigraphic elevations for rock units at the Cayuga Site for use in the RI report.

The picks are mainly from well logs, although I also used the core descriptions at all new GE wells to verify the picks. Note that I also updated a few elevations for the Skaneateles/Marcellus contact at several older wells. All new data are highlighted in yellow.

Please let me know if you have any questions.
